

Title page form

The title page should be submitted separately from the article. The guidelines should be followed and the respective fields completed:

Article title:

--

The title should reflect the content of the article. In some situations it should reference the design of the study, for example, randomized clinical trials, systematic reviews, and meta-analyses. It should contain no more than 17 words. If it includes a subtitle, the combined length should not exceed 21 words.

Authors:

Author name and initials	Academic Degree	Affiliation	ORCID ID

Information on all authors: Name used in scientific publications; academic degree; affiliations - institution(s) where they work and/or research center they belong (maximum 3); ORCID identification.

Statement of authors' contributions:

Author's name	Contributions

For each author, please state: the author's name and the CRediT roles they have fulfilled, indicating the level of contribution (where applicable). **Roles: Conceptualisation, Data curation, Formal analysis, Fund acquisition, Research, Methodology, Project management, Resources, Software, Supervision, Validation, Visualisation, Writing – original draft, Writing – review and editing.**

Example: Author's name – Conceptualisation (lead); Methodology (equal); Formal analysis (supporting); Writing – original draft (lead); Writing – revision and editing (equal).

All authors declare that they cumulatively meet the four ICMJE criteria for authorship and that they have approved the submitted version.

Corresponding Author	Full name; email address, institutional address, phone number.

Total number of words in the article, excluding bibliographical references, tables, charts, and figures	
Number of tables	
Number of figures	

Conflicts of interests

This information should only be entered here on the title page

Based on the completion of the form available at [ICMJE Form for Disclosure of Potential Conflicts of Interest](#), completed and sent separately, you must draft the text regarding the disclosure of conflicts of interests.

If there are any conflicts of interest, the text should be written according to the items you answered yes to.

If there are no conflicts of interest, the following statement should be included: "No conflict of interest has been declared by the author(s)."

This text will be included in the article if it is published.

Sources of Support / funding

If none, state that the study was not funded.

Study protocol registration code (if applicable)

This information should only be entered here on the title page.

Acknowledgments

Institution acknowledgments, or acknowledgments of non-authors who contributed to the article.

Declarations	
I declare, for all intents and purposes, as the corresponding author of the article in question, that (mark with a ✓):	
	The submitted article is original.
	It has not been submitted to/published in any other journal or book chapter, among other media.
	Grant the right of first publication to the journal.
	Authorization from the institution where the study was performed (if applicable).
	Declaration from the Ethics Committee where the study was conducted (if applicable).
	All authors who approved the final version to be submitted to the journal are exclusively accountable for the content of the article.

Data Availability Statement and Materials

Authors are encouraged to make all content related to their manuscript (data, program code, and other material) publicly available before or at the time of publication. Exceptions can be made for legal or ethical reasons. This practice aims to support the evaluation of the manuscript, and if approved, to enhance the preservation and reuse of the content and the reproducibility of the studies.

Are the contents underlying the manuscript text available without restrictions, or will they be by the time of publication?	
☐	Yes: ☐ All the data are presented in the article ☐ Data openly available in a public repository that issues datasets with DOIs ☐ Data openly available in a public repository that does not issue DOIs ☐ Data derived from public domain resources ☐ Data available in article supplementary material Enter titles and respective URLs, accession numbers or DOIs of the content files underlying the article text (use one line for each data):
☐	No: ☐ Data available on request from the authors ☐ Embargo on data due to commercial restrictions ☐ Data available on request due to privacy/ethical restrictions ☐ Data subject to third party restrictions ☐ Author elects to not share data Justify the option of not making the data publicly available:
☐	Data sharing is not applicable.

Data Availability Statement and Materials (up to 40 words)

In line with open science principles, if the article is published, do you consent to the publication of the reviewers' comments, as well as your responses, as supplementary material to the article? The content of the peer review will only be published once all reviewers and authors have given their consent.

Yes, I consent

No, I do not consent
