

QUANTITATIVE ORIGINAL ARTICLE CHECKLIST

Authors should submit this checklist along with the article (check compliance with the recommendations):

- It is an original work that has not been submitted for appraisal or published in any journal or book, or any other type of publication.

STRUCTURE

- It meets the recommendations in terms of number of words - 6000.
- It meets the recommendations for font (Garamond) and size (10), and justified text in a single column. Numbered page lines. Paging.
- It complies with the maximum number of tables and figures (max. 6).

TITLE

- Clear, concise, and coordinated with the study.
- Maximum of 17 words. If it includes a subtitle, the combined length should not exceed 21 words.

AUTHORSHIP

- All authors meet the authorship criteria assumed by the journal.
- The authors are only identified on the title page and not in the article.

TITLE PAGE

- The form has been completed and submitted separately.

ABSTRACT

- Written in the language of submission.
- Maximum of 300 words.
- Structured as follows: Introduction; Objectives; Method; Results; Conclusion.

KEYWORDS

- Minimum of 4 and maximum of 6, most of which are validated in the [Mesh](#) or [DeCs](#) indexing terms browsers.

INTRODUCTION

- States the problem.
- Delimits the problem and demonstrates its relevance.
- Clarifies the central concepts of the study and their relationship to each other.
- Pertinent and consistent review of the literature - state of the art.
- Works published in the last 5 years.
- Most relevant classical studies.
- Citation of primary sources.
- Presents the study objective(s), research question/hypothesis(es).

METHOD

- Indicates the type of study /design.
- Indicates the population/participants and the sampling procedure.
- Presents the data collection instruments and their relationship with the variables being studied.
- Describes the data collection and analysis procedures.
- Accurately presents the criteria defined to guarantee validity and reliability.
- Presents ethical and legal considerations.
- Submit the ethics committee's declaration of approval separately.

RESULTS

- Describe the characteristics of the sample.
- Present the results for each of the objectives/questions/hypotheses.
- Present a correct and accurate data analysis.
- Respect the rules of presentation of charts, tables, graphs, or figures.

DISCUSSION

- Compare the results with the scientific literature.
- Presents new knowledge that emerges from the research.
- Clearly indicates what was known previously and highlights what is new in the study.

CONCLUSION

- Presents the conclusions in response to the research objectives/questions/hypotheses, supported by the results.
- Includes the limitations of the study.
- Presents the implications/recommendations of the study.

REFERENCES

- References follow the Vancouver style.

DRAFTING

- Scientific writing with clarity and accuracy.
- Primary citations.
